DETAILED ACTION

Drawings

The application having been allowed, formal drawings are required in response to this Office Action.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The present invention relates in general to displaying selected garments on a computer-simulated mannequin. The closest prior art, Cone (US Patent No. 5,850,222) teaches a similar system, which also deals with displaying a graphic image of a person modeling a garment. Cone teaches a virtual dressing room system defining a three-dimensional shape of the human body wearing particular garment(s). However, Cone fails to teach the step of simulating draping and collision of the garment with the mannequin within the simulation scene to generate a three-dimensional rendering frame of the mannequin wearing the garment and the constraining portions of the garment to reside within or outside of particular shells defined around the mannequin in the rendering frame. Furthermore, Cone fails to disclose or suggest a compositing rule interpreter for displaying the two-dimensional images of user-selected garments and of a selected mannequin in a layered order dictated by compositing rules. The Examiner searching the above limitations, in combination with the other elements of the claims, were not disclosed by, would not have been obvious over, nor would have been fairly suggested

Art Unit: 2672

by the prior art of record. The dependent claims being further limiting to the independent claim, definite, and enabled by the Specification are also allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
